

IN THE CLAIMS

Please amend the claim 4 as rewritten below.

A1

4. (Amended) A fire protection glass product as claimed in claim 1,
wherein said heat-ray reflection film is formed on at least one
surface of at least one of said fireproof glass plates.

Please add the following new claims.

A2

9. (New) A fire-protection glass product having a heat shielding
characteristic, comprising:
two fireproof glass plates;
a resin intermediate layer interposed between said glass plates
and made of a material of fluorocarbon resin;
a heat-ray reflection film formed on the surface of at least one of
said glass plates, made of a material of indium oxide containing tin,
having a thickness between 1000Å and 15000Å, and having a reflectance
of 50% or more for a light of the wavelength of 1500nm, a reflectance of
70% or more for a light of the wavelength of 2500nm, and reflectance of
80% or more for a light of the wavelength of 3000nm.

10. (New) A fire-protection glass product as claimed in claim 9,
wherein at least one of said fireproof glass plates is made of a
heat-resistant transparent crystallized glass.
